

# PSC PUSH/PULL HANDS-OFF SAFETY TOOL

## PSC LOADGUIDER™ MANOEUVRE LOADS SAFELY

India's leading Hand Safety Specialist Company, Project Sales Corp introduces the new & improved **PSC LoadGuider Hands-Off Safety Tool** - a robust fiberglass push/pull pole fitted with a nylon head to safely manoeuvre loads, by keeping hands away from a potential pinch and crush injury zone.

The **PSC LoadGuider Tool** helps to mitigate the risk of pinching or crushing hands & feet while handling suspended loads or maneuvering loads in tight positions until the load is in its final placement/resting position. The tool is simple to handle and allows user to guide a suspended load from a distance, either with push or pull activities.

The **PSC LoadGuider Tool** also avoids unnecessary strain on the wrists during maneuvering operations and protects from cuts, pinches, abrasion, lacerations, etc. thus improving hand safety.

### FEATURES

- Extremely lightweight, equipped with an ergonomic non-slip D handle.
- Material - Fiberglass, Plastic, Nylon
- Tested to 300 kgs Push & 150 kgs Pull Loads
- Available in three lengths of 42", 50" & 72"
  - # **PSC-LG-42** - approx. tool weight 1.15 kgs
  - # **PSC-LG-50** - approx. tool weight 1.29 kgs
  - # **PSC-LG-72** - approx. tool weight 1.57 kgs

### APPLICATIONS AREAS

- To push loads to make them rest in final position
- To pull slung loads for guiding them into position
- To retrieve taglines
- Maneuver drill pipes, tubulars and other suspended loads.

Push Against Flat Surfaces,  
Corners of Suspended Loads

Snag Taglines,  
Pull Slung Loads

Move pipes & loads

\*Tested for PSC by SGS Group
